Children's Literature Activity/Lesson Plan

To receive full credit for this project, each of the criteria listed below must be met. Complete this form and send it to me as an email Word doc attachment.

Name Cynthia Johnson Date 3-8-12

Book Title When Pigs Fly

Author Lisa Wheeler Illustrator Frank Ansley

Why did you choose this book? I choose this book because I feel it will stimulate the students imagination.

Utah State Standard: Uen - Mathematics - 2nd Grade - Utah Curriculum K-12 Core - Mathematics, Elementary.

Objective (s): Intended learning for the students is to see pattern and repetition as mathematics is learning pattern to find solutions to problems.

Materials: Word list to count how many times a word is repeated, construction paper, crayons and markers, glue and scissors to make capes.

Background for Teachers: I would suggest using this book, it helps to identify math out using numbers. Know what concept and materials you need to complete your idea to create mathematical interaction with crafts.

Intended Learning Outcomes: (same as objectives) Again, math is very much like patterns and teaching a method that simulates with pattern helps the student remember what steps are needed to solve and find the solution.

Instructional Procedures: Follow instructions and listen to the meaning of the story.

Family Connections: (take home activity) Take home activity would be a word hunt, they would have a specific word & when they or their family member would see they would count the word & turn in how many times & where they saw

Assessment Plan: (how do you plan to assess whether or not students gained the the word, skill/concept?)

To determine if the students gained the concept and skill. I would assess the family interaction and see how they applied pattern to words and see if they remember things by repetition. Also to teach them to see how it's a story, with math problems in the words.
